VICE-President, Rupiah Banda, has directed the Lusaka City Council (LCC) to terminate contracts of companies, which have failed to carry out satisfactory work on the drainages in some townships affected by floods.

Mr Banda further revealed that the Government was in the process of involving a Chinese contractor who would help drain the water, which was stagnant especially in Kamwala South and Misisi townships.....

Earlier, Railway System of Zambia (RSZ) donated about K20 million worth of diesel and \$100,000 transport credit to the DMMU.

Receiving the donation Mr Banda said the \$100,000 transport credit would be used to move relief food and other materials.

And RSZ shareholder, Zion Elani, said his organisation was committed to helping the Government in mitigating the flood impact.
